Credit Unions Partner with YOU, our Member!

Your Credit Union has security measures to protect your account information, but we can't be effective without your help and cooperation. Here are some easily implemented precautions to help safeguard your personal information:*

- Strong Passwords - Experts advise a combination of letters and numbers, and advise against using easily guessed passwords such as birthdays or home addresses.
- Anti-Virus Protections - Make sure the anti-virus software on your computer is current and scans your email as it is received.
- Email Safety - Email is generally not encrypted so be wary of sending any sensitive information such as account numbers or other personal information in this way.
- Sign off and Log Out - Always log off by following the credit union's secured area exit procedures.
- Don't get Phished - Crooks are always trying to get your personal information, and they employ some ingenious methods. Don't respond to any unusual email requests for personal information - SAFCU already has all your information. When in doubt, call your credit union.
- Monitor your Accounts - When you check your accounts regularly, you can let us know immediately if you encounter anything that does not seem right.
